## **BSPP Selector Valves**

#### **FEATURES**

• For Approvals, see the "Compatibility" table.

#### REACH and RoHS compliant

#### **DESCRIPTION**

The BSPP selector valves route the agent from a central cylinder bank to the relevant area being protected. All BSPP selector valves are 2-way ball valves with full bore. The selector valve actuator operates pneumatically from manifold pressure routed through a pressure regulator on the backplate manifold and the respective backplate solenoid valve.

Selector have BSPP threaded inlet and outlet ports for connection to the distribution piping for sizes 1, 1 1/2, and 2 inches. For 3 in. and 4 in. selector valves, uses DIN 2638 flanges to connect to the system piping.
